Vaccine program updates

COVID-19 VACCINATION FOR CHILDREN YOUNGER THAN 5

COVID-19 vaccination among children younger than 5 years of age will allow nearly 20 million more children to be protected against COVID-19, including severe outcomes like hospitalization. Vaccinating children 6 months and older is a critical opportunity to protect them from severe illness, especially those disproportionately impacted by COVID-19, such as certain racial and ethnic groups and children with disabilities. COVID-19 vaccination among younger children can also help decrease the strain on the healthcare system and provide families with greater confidence with children participating in childcare, school, and other activities with less risk for serious COVID-19 illness. [Click here](#) for more information and resources.

V-Safe reminder

The CDC has updated V-Safe. Please remind your patients about this important resource. [Click here](#) for V-safe print resources.

Fact sheets

There are multiple fact sheets available for your use:

Pfizer and Moderna Training Schedules

Pfizer Medical Updates & Immunization Site Training for all Healthcare Providers led by Pfizer Vaccines US Medical Affairs: Pfizer has expanded its training sessions to address questions about currently recommended COVID-19 vaccine products as well as vaccines for children that are anticipated to be approved through an EUA. Trainings now include presentations on COVID-19 vaccines with a MAROON Cap for individuals 6 months through 4 years of age. For details, see [dates and links for upcoming training sessions](#). While current trainings follow a Tuesday, Wednesday, Thursday schedule, Daily trainings (Monday through Friday) will begin Monday, June 20, 2022, and continue at least through July 8, 2022 (with no training on July 4th). (Please note, the COVID-19 vaccine has NOT yet been authorized or approved for use in individuals younger than 5 years of age in the United States.)

Moderna Trainings: Plans are for Moderna to offer daily training webinars on COVID-19 vaccine products beginning the week of June 21, 2022.

CDC training materials for administering vaccine to young children

The CDC has a host of information and materials for administering vaccine to young children. These include training guidelines, e-learning, videos and printable job aids. All materials can be accessed from this page: [Vaccine Administration Resource Library](#)

Oral antivirals program updates

Antiviral therapeutics allocation requests now available via ABC Order!

Pharmacies participating in the FRPTP may now request COVID-19 Paxlovid and Molnupiravir allocation through ABC Order starting today, similar to how COVID-19 vaccines are requested. Email requests for therapeutics shipments will no longer be accepted. **If you do not request therapeutics allocation through the process outlined below, therapeutics inventory will not be shipped to your pharmacy.** Allocation requests placed before **12pm ET Wednesdays** will be delivered to your

pharmacy early the following week. Orders submitted after 12pm on Wednesdays won't be processed until the next cycle.

Participating in the oral antivirals program

If your pharmacy is a participant of the vaccine program and would also like to participate in the oral antivirals program, contact the Elevate Enrollments team at ElevateEnrollments@AmerisourceBergen.com.

Resources

Pediatric Operational Planning Guide

The CDC has updated the Pediatric Operational Planning Guide. The updated guide has been posted here: [COVID-19 Vaccination for Children | CDC](#). The direct link to the PDF of the guide is here: [Pediatric-Planning-Guide.pdf \(cdc.gov\)](#). See additional information about pre-ordering these vaccines in the article above.
