

Keep more money from every transaction

Brought to you by Cencora, Merchant Services is a payment processing offering designed to help independent retail pharmacies navigate the credit card¹ processing landscape while supporting day-to-day operations.

What it is

Merchant Services is a new offering designed to help independent retail pharmacies evaluate opportunities to reduce credit card processing costs through a pharmacy-focused approach.

Built to meet the needs of pharmacy businesses, this offering may help increase savings opportunities while maintaining the workflow and functionality pharmacies rely on. By reducing payment processing costs, the business can operate more efficiently and may improve profitability.

Why it matters

Independent pharmacies continue to face margin pressure from many directions, and payment processing fees can be a meaningful operating expense that is often difficult to evaluate and compare. Merchant Services starts with an obligation-free savings assessment to help pharmacies understand whether an opportunity exists. For those that move forward, this offers a practical way to reduce processing costs and may increase margin from pharmacy sales. Cencora supports this offering by helping pharmacies explore competitive merchant service rates and implement it at their pharmacies.

Request an obligation-free savings assessment

See whether your pharmacy may have an opportunity to reduce credit card processing costs.*

**For an obligation-free assessment you will need to provide 6 months of merchant service statements. Merchant service statements will be used solely for the obligation-free savings assessment and handled in accordance with applicable confidentiality and privacy requirements.*
