

AmerisourceBergen

You deliver the care your patients deserve,
PRxO Generics® for Long-term Care helps
keep your business healthy

Product access solutions

Enhanced Secondary automatically price-matches and substitutes a secondary item when the ordered PRxO Generics primary item is out of stock and a secondary alternative is available.

PRxO Generics Select extends the PRxO Generics formulary to include selected patient preferred manufacturers.

When the size of a primary PRxO Generics item ordered is out of stock, automatically replace the out of stock product with an alternative size of an equivalent item.

There are specific products you need to provide quality care with a reduced system updates. Provide a quarterly list of six opt-out items, override the replacement process, and ensure the product you need is made available to you.

Manufacturer switch discount

To resolve supply issues or provide product at a better cost to you, formulary changes can occur. In the 30 days following an adjustment, customers are eligible for 5% off invoice price on replacement items, to help with the transition of product.

First to Shelf®

Maximize profits and control patient costs by quickly converting branded prescriptions to newly-launched PRxO Generics products.

We automatically ship you an approximately two-week supply based on your branded equivalent purchase history to help you meet patient demand while limiting the potential for returns.

Price increase protection

Bridge the gap in reimbursement payments with temporary price protection for major WAC increases.

Receive a credit for up to 4 weeks of purchases when a PRxO Generics primary oral solid drug incurs a one-day WAC increase of +20% or greater.
